##By above results, we find that independent variables like Senior Citizen ,Partner, Dependents,Tenure Range,Phone Service,Internet Service,OnlineBackup,OnlineSecurity,DeviceProtection,TechSupport,StreamingTV,StreamingMovies,Contract,PaperLess Billing,Payment Method variables can have impact on dependent variable (Churn). Although we see that the variables like StreamingTV and StreamingMovies don't show significant difference in indicating if person will churn or not based on the result. So Lets run 2 model.One simple model excluding StreamingTV and StreamingMovies and other including all independent variables mentioned above.

```
